

Two-Stage Training Strategy

Structured Annotation Dataset

Ranking Data:

1. Image Content Identification: A female cosplayer is wearing extremely revealing and vulgar attire while performing exaggerated hip gyrations on an escalator in a public space. The design of her outfit is deliberately crafted to emphasize the exposure of her chest and hips, creating a strong atmosphere of sexual suggestion through exaggerated tailoring and sheer fabric effects.

2. Rule Match:

2.1 High-Risk Elements: No
2.2 Mid-Risk Elements: {'Exposed buttocks'},
2.3 Low-Risk Elements: {'Indecent Dressing'};

3. Severity Score Calculation

[Calculation Formula]

4. Final Severity Score: 42

Prompt

Please determine the severity of violations in the image based on the moderation rules and with reference to the scoring criteria, and output the reasoning process. Strictly follow the procedure below for analysis and scoring:

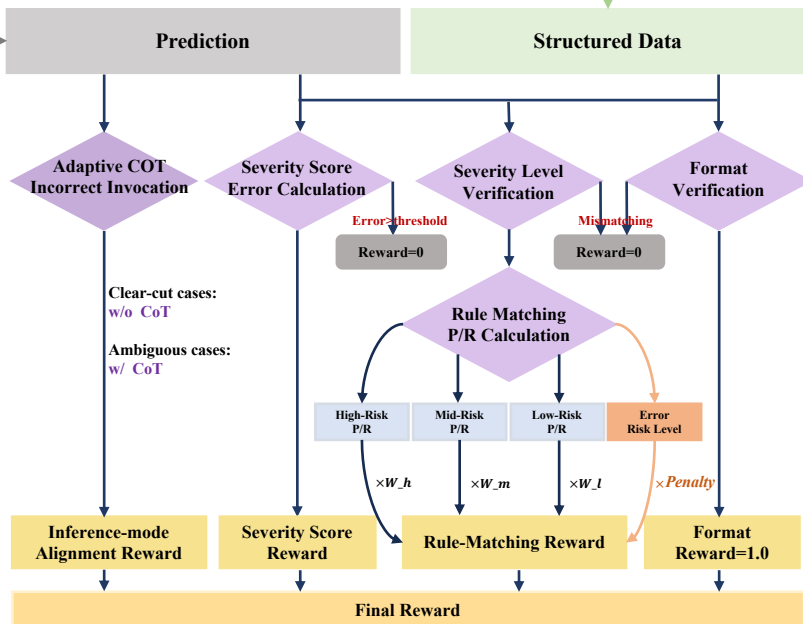

Moderation Rules:

1.High-Risk: [Specify high-risk criteria, e.g., explicit, violent content]
2.Mid-Risk: [Specify mid-risk criteria, e.g., suggestive]
3.Low-Risk: [Specify low-risk criteria, e.g., borderline content]

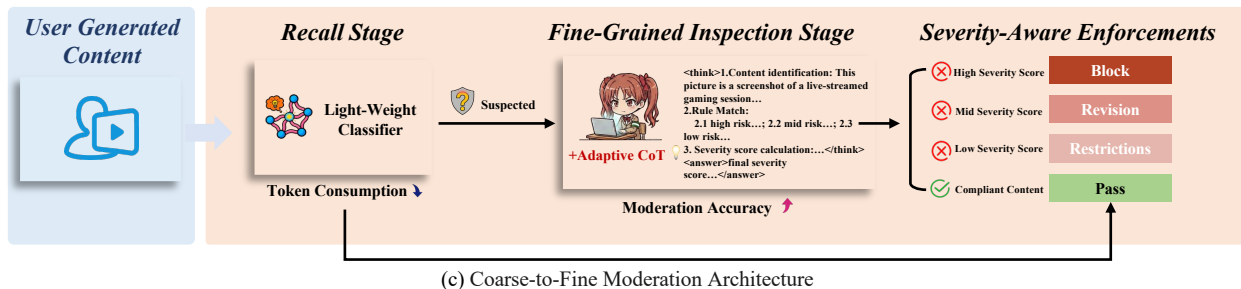

Score Calculation Method:

1.Determine Base Violation Tier: Identify the violations.
2.Preliminary Severity Calculation: Assess the content's severity based on violations.
3.Final Adjustment: Adjust severity based on specific rules and criteria.
